

House Education Public Testimony

January 26, 2006

Nancy Vernon

- I have provided you with and entered into public record OSPI public documents discussing the building of a Temple and implementation of a religious order.
- The OSPI Temple document notes, “As human form transform into the Light body, it takes on new forms that are perceived in the higher dimensions.”
- A study into the cult beliefs of McCune and Bergeson reveals that the presentation of higher-order thinking throughout the educational system is designed to advance the idea of *Light bodies*, and the transformation process of what Bergeson and McCune believe are the *Light bodies*, which is achieved through higher-order thinking.
- The WASL is defining the individuals who are considered the light bodies, or level 4 students through the assessment of the thinking process.
- The second OSPI public document demonstrates how the State Superintendent Terry Bergeson, Assistant Superintendents Shirley McCune and Andrew Griffin, and contractor Robert Carkhuff have implemented their religious cult beliefs and practices into our public school system.
- Your immediate action is necessary to stop the advancement of a religious order that serves to oppress students with disabilities and students of color.
- You have been deceived, lied to and manipulated by the current OSPI administration.
