

About the Contributors

Carkhuff and Berenson have called for "*possibilities thinkers*": new "*human processors*" whom they label "*scientist-biographers*":

- People who transform static content into dynamic processes by processing interdependently with all phenomena – human and otherwise;
- People who commit ideation to the biography of continuously changing phenomena that, in turn, generate their own changeable destinies.

We aspire humbly to become "*scientist-biographers*"!

Debbie D. Anderson, D.Ed.
Director, Center for Human
Resource Development,
American International College

William Anthony, Ph.D.
Director, Center for Psychiatric
Rehabilitation
Boston University

Cheryl B. Aspy, D.Ed.
